RE: Survey and Evaluation Results for the Special Status of Native Plant Populations and Sensitive Natural Communities performed for APNs 133-112-020 and a portion of 133-220-003 located at 810 W. Agua Caliente Road, Sonoma County, California.

A special-status plant survey was performed by Anya Perron-Burdick, M.S. within the project boundary on April 21, May 18, and June 15, 2023 (Plate 1). Botanical field surveys were completed in accordance with California Department of Fish and Wildlife (CDFW) Protocols for Surveying and Evaluating Impacts to Special Status Native Plant Populations and Sensitive Natural Communities (March 2018). A map and table from the CDFW California Natural Diversity Database Rare Find database and a table from the California Native Plant Society Rare Plant Inventory of known special-status plant species in the proximity and within the nine quadrangles of the project site was evaluated prior to botanical field surveys (Table 1 - Potential for Occurrence). Weather data collected for 2022 would be considered dry with 2.94 inches of rainfall between January-April 2022, followed in 2023 by a wet winter season with 26 inches of rainfall between January-April 2023. The surveyed area soils are classified as 37.7 percent Pleasanton clay loam within the first 37 inches on a 2-5 percent slope, 25.9 percent Spreckels loam within the first 18 inches on a 2-9 percent slope, 14.6 percent Huichica loam within the first 14 inches on a 2-9 percent slope, 13.3 percent Yolo loam within the first 24 inches on a 0-10 percent slope, 4 percent Tuscan cobbly clay loam within the first 9 inches on a 0-9 percent slope, 2.5 percent Riverwash within the first 60 inches on a 0 percent slope, 2.1 percent Los Robles gravelly clay loam within the first 30 on a 2-9 percent slope, and 0.4 percent Spreckels loam within the first 18 inches on a 15-30 percent slope. A Manual of California Vegetation (Sawyer 2009) classifies the habitat communities within the project boundaries as Annual and Perennial non-native Grassland with pockets of seasonal wetland (as mapped in 2018), Oak Woodland, and Riparian Corridor.

The dominant vegetation alliances within the habitat communities are 42.026-02 Wild oats and annual brome grasslands, 42.051.02 *Phalaris aquatica* with pockets of seasonal wetland dominated by 42.052.01 *Hordeum brachyantherum* and *Pleuropogon californicus*, 71.040.00 Valley oak woodland and forest, and 71.045.00 Valley oak riparian forest and woodland. The Wild oats and annual brome grasslands are dominated by *Avena barbata*, *Avena fatua*, *Bromus diandrus*, *Bromus hordeaceus*, *Elymus capu-meusae*, and *Festuca perennis*. The *Phalaris aquatica* grasslands are dominated by *Phalaris aquatica*, *Festuca perennis*, *Briza minor*, and *Carduus pycnocephalus*. The pockets of seasonal wetlands within the *Phalaris aquatica* habitat are dominated by *Hordeum brachyantherum*, *Pleuropogon californicus*, *Cynosurus echinatus*, *Juncus bufonis*, *Cyperus eragrostis*, and *Rumex crispus*. The Valley oak woodland and forest habitat is dominated by *Quercus lobata*, *Quercus agrifolia*, *Quercus kelloggii*, *Eucalyptus globulus*, *Aesculus californica*, *Genista monspessulana*, *Toxicodendron diversilobum*, and *Vinca major*. The Valley oak riparian forest and woodland is dominated by *Quercus lobata*, *Eucalyptus globulus*, *Fraxinus latifolia*, *Umbellularia californica*, *Brassica nigra*, *Rubus armeniacus* *Salix*

List of special-status species has been compiled based on plant species listed in the CNDB for the Sonoma USGS quadrangle (2023) and based on CNPS inventory (CNPS 2023) records for the Sonoma quadrangle and the eight surrounding quadrangles. Note: FESA: FE = federally endangered; FT = federally threatened. State listed under the California Endangered Species Act and the California Native Plant Protection Act CESPA: CE = state listed as endangered; CT = state listed as threatened; CR = state listed as rare. Global Rank: G1 = critical imperilment on a global basis, the species is at great risk of extinction; G2 = Imperiled, at high risk of extinction or elimination due to restricted range, few populations or occurrences, steep declines, severe threats, or other factors; G3 = Vulnerable, at moderate risk of extinction or elimination due to a fairly restricted range, relatively few populations or occurrences, recent and widespread declines, threats, or other factors; G4 = Secure, at fairly low risk of extinction or elimination due to an extensive range and/or many populations or occurrences, but with possible cause for some concern as a result of local recent declines, threats, or other factors. State Rank: S1 = Critically Imperiled At very high risk of extirpation in the jurisdiction due to very restricted range, very few populations or occurrences, very steep declines, severe threats, or other factors; S2 = Imperiled in the state because of extreme rarity or because of some factor(s) making it especially vulnerable to extirpation, typically 6 to 20 occurrences or few remaining individuals (1,000 to 3,000); S3 = Uncommon not of conservation concern, typically, 21 to 50 known occurrences or populations; S3 ranked species are not yet susceptible to becoming extirpated in the state but may be if additional populations are destroyed. California Rare Plant Rank: CRPR 1A = Plants presumed extinct in California; CRPR 1B = Rare, threatened, or endangered in California and elsewhere; CRPR 2 = plants rare, threatened or endangered in California, but more common elsewhere; CRPR 3 = plants about which more information is needed; CRPR 4 = Uncommon in California. Other Status: International Union for Conservation of Nature: IUCN_CE = critically endangered, IUCN_E = endangered, IUCN_LC = least concern, IUCN_NT = near threatened, or IUCN_V = vulnerable. California Plant Rescue Institutions, Bureau of Land Management sensitive (BLM_S). United States Forest Service sensitive (USF_S). California Plant Rescue Institutions: SB_CalBG/RSABG = California/Rancho Santa Ana Botanic Garden, SB_SBBG = Santa Barbara Botanic Garden, SB_UCBG = UC Botanical Garden at Berkeley, SB_UCSC = UC Santa Cruz, SB_BSB = Berry Seed Bank, SB_KRBG = Kew Royal Botanic Gardens, SB_SDZC = San Diego Zoo CRES, SB_NGSB = Native Gene Seed Bank, SB_USDA = US Department of Agriculture.
