EXTERNAL

Well you have a choice either add to the climate load we are carrying or not, don't you think 200,000 cars and trucks burning at 900 degrees are enough to wreak our air or are you finally going to wise up and stop the madness. Electric buses are not going to change a damn thing but anything is better than asking the good people of Sonoma County to give up their gas cars which will result in a riot which scares the hell out of you.

Pierre Crist

Dear Planning Commissioners,

Please support the staff's recommendation that the Commission approve the ordinance, resolution, and zoning amendments to prohibit new retail fuel station development and to prohibit the expansion of retail fuel infrastructure for retail fuel stations.

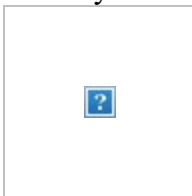

Sonoma County has enough gas stations. As you know the countywide map presented by the planning commission shows that the vast majority of Sonoma county residents live within 5 miles of an existing gas station.

We need to direct resources and real estate to support a more sustainable transportation infrastructure including improved public transportation, more EV charging stations, and a larger network of dedicated pedestrian and bicycle paths.

Let's focus on moving our energy infrastructure toward a greener future, rather than continuing to allow the construction of new gas stations.

Feel free to contact me if you have any questions or concerns.

Thank you!
