

**PJR 078 | 4 - WATER SUPPLY**

Impact 3.15-2 Development under the Proposed Plan would have sufficient water supplies available to serve the Planning Area and reasonably foreseeable future development during normal, dry and multiple dry years. *(Less than Significant)*

Water service to the Planning Area is presumed to be provided by the Valley of the Moon Water District through the utilization of onsite water sources. A significant impact would occur if the District would not have sufficient water supplies available to serve the Planning Area during normal, dry, and multiple dry years through 2045. Implementation of the Proposed Plan would not increase water demand within the Planning Area from historical peak amounts. Further, the Proposed Plan includes multiple policies that support water conservation and efficiency to minimize additional demand, including policies 8-10, 8-11, and 8-15. These policies would further reduce demand by implementing measures such as greywater systems and water efficient plumbing fixtures. Sonoma County's General Plan, and Municipal Code also include multiple provisions that support water conservation.

Sonoma Developmental Center Specific Plan  
DRAFT Environmental Impact Report

Therefore, based on the findings of the WSA and implementation of the mitigation measures described below, the District will have sufficient water supplies available to serve development pursuant to the Proposed Plan during normal, dry, and multiple dry years. As such, impacts would be less than significant with the following Standard Conditions of Approval incorporated.
